

**HAPPY RABBIT
INU YEAR**

WHITEPAPER

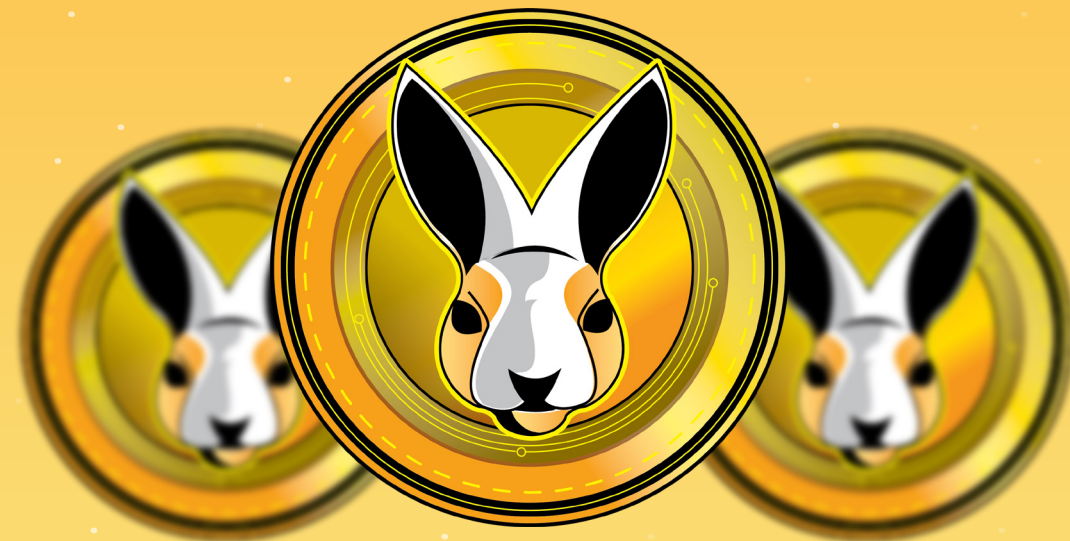

HRV

Happy Rabbit Inu Year born in 2022 in a aggressive bear market with the purpose of taking over in 2023, which is the Rabbit Year in Chinese culture and we are ready to celebrate.

OPPORTUNITY

Crypto Meme culture start back in 2013 with DogeCoin. In 2020 Dogecoin create people millionaires after Elon Musk tweeted about it on his official twitter account. Shiba Inu, Floki Inu, BabyDoge and more others start pumping and climb the moon, after the father of meme coins take care of them as well. For the people who missed the opportunity with those projects above, 2023 is Rabbitons year.

THE DAGGER

Happy Rabbit Inu Year aims to be the dagger of meme coins and set the trend for 2023. Many people will argue that is thousands of meme coins on the market at the moment, but HRY is different, fresh and THE DAGGER. And here is why:

After some analysis made, I find out there a HUGE OPPORTUNITY and decide to create HRY. All the top 5 meme coins achieve success after Elon Musk tweet about it and send them to the Moon. HRY goal is to reach the top 5 meme coins in 2023-2024 with same type of influence from Elon, our future Stepfather.

ELON THE STEPFATHER

Elon Musk will become the StepFather of Happy Rabbit Inu Year because he will tweet, adopt and send us to the moon.

Getting deep into the analysis I find out Elon send his greetings to the Chinese people every year by posting on his twitter page. (Source: Twitter). Guess who's birthday is next year ? You're right. Happy Rabbit Inu Year.

ARE YOU READY?
